

Aug. 2, 1928.

Mr. N. G. Mitchell,
Upalco, Utah.

Dear Sir:

RE: SAND WASH DIST.

I am advised by Commissioner Marchant that your headgate is not of a character to prevent, during floods, of more water than covered by your right from entering your canal. I dislike to require the water users on Sand Wash to put in the costly devices that are required in other parts of the state but I must insist that what devices you have are sufficiently tight and adequate to prevent a larger diversion of water than your right calls for.

Yours very truly,

State Engineer.
